## Getting there faster: configuring and placing orders with RailDesigner®

These days, precision and speed are of the essence when it comes to workflows in planning and production. Intelligent solutions which simplify complex processes have top priority – like RailDesigner®, which makes the assembly of terminal rails child's play.

The new version of RailDesigner® is a time-saving program which makes it much easier for you to select, create 2-D and 3-D plans and order assembled terminal rails with a high level of precision.

It also speeds up the process of acquiring quotations and placing orders, for example by eliminating the need for time consuming fax orders: all processes can be initiated directly using the software. You configure your projects and the rest virtually takes care of itself!

### Compact downloads: always up to date

Software updates for RailDesigner® can be downloaded easily from the Internet, meaning you always have access to the latest version of our product database. You can find the latest software information at [www.raildesigner.de](http://www.raildesigner.de).

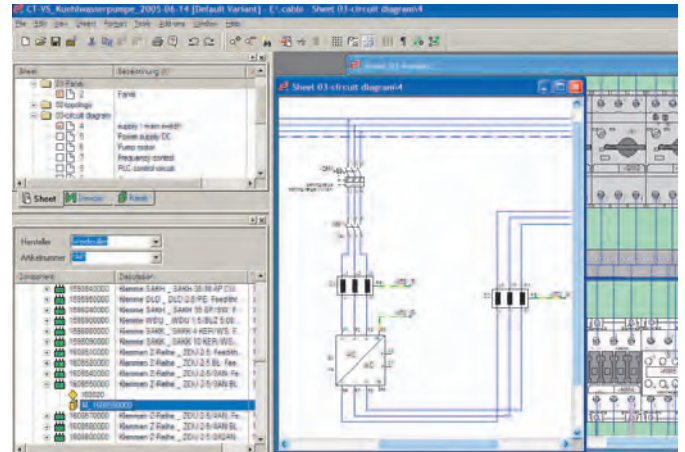

## Quick and easy: working with RailDesigner®

Design your project with a few clicks of the mouse! Detailed product information and search functions make it easy for you to select the items you need from the database. The products needed for assembly are individually configured in product libraries and added to the mounting rail using the mouse or keyboard commands.

RailDesigner® helps you to position cross connections, wire jumpers, end plates, partition plates, end brackets, your own articles or even free space.

RailDesigner® automatically generates:

- Parts lists
- Detailed descriptions of the terminal rail
- Notes on correctly assembling the structure

Example of a circuit diagram

# Right first time: clarity with a single mouse click

## Go straight to the right product

- The user-friendly interface offers you an instant overview
- Intelligent database searches and product libraries enable you to select items quickly: you have access to our entire product catalogue
- Product libraries can be compiled on an individual basis
- Efficient assembly of the mounting rails thanks to the use of individual modules

## Problem free: data transfer

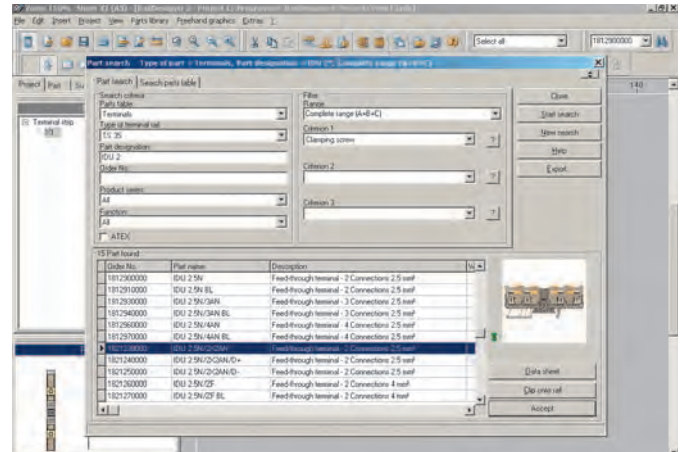

- Simple data exchange with your existing IT systems
- Exports the terminal rail design in dxf, dwg and bmp formats
- Can export component lists in various formats (e.g. CSV, Excel, HTML)
- Automatic data transfer of marking data to M-Print® PRO label designer
- Easy connection to your existing merchandise information system

## Extra functions for maximum convenience

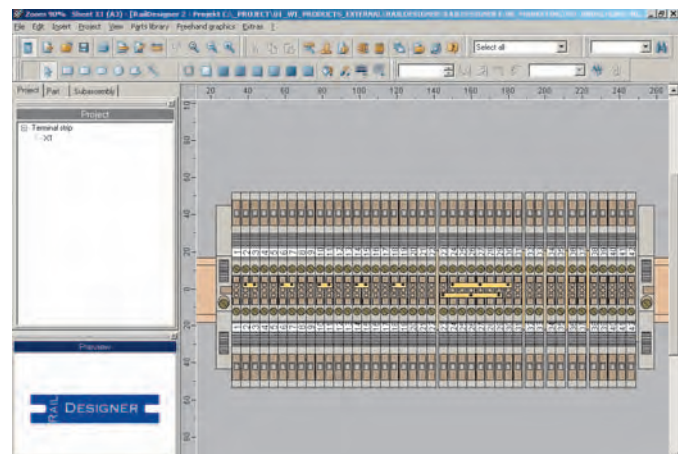

- Automatic installation tips
- Clear project processing and management
- Multimedia training program
- Interactive help

## Support whenever you need it

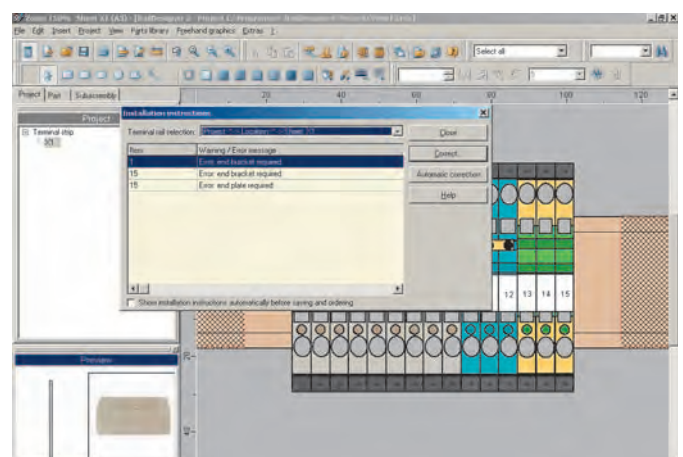

- Request quotations and place orders for your projects by e-mail with a single mouse click – any time of day
- Extra products can also be ordered quickly and easily
- User support: send your questions or comments to [raildesigner@weidmueller.de](mailto:raildesigner@weidmueller.de) and we will reply as quickly as possible

# Import data and you're done: interaction between RailDesigner® and CAE or CAD systems

## Import and export

Simply plan and design your projects using your normal CAE software. RailDesigner® will take care of everything else for you. With its integrated interface, inputting data from your CAE system is easier than ever. That means maximum convenience for you: just import your data and you're done!

The following information is transferred during data exchange with your CAE programs:

- Terminal data
- Cross connections
- Markers
- Accessories

## Supporting your workflows

New 3-D design for quick exporting: just incorporate the 3-D view of the terminal strip design into your CAD system!

## Secure integration of CAE: strong partnerships

Our cooperation schemes with the following CAE system manufacturers guarantee that your data will be transferred smoothly.

- |                       |                       |

# Easy planning: RailDesigner® is extremely versatile

## Production by Weidmüller

Export

Import

Data is transferred straight to Weidmüller

Customer-specific service

Assembled according to your specifications

- terminal rails
- markers

Product delivery

## Own production

Export

Import

Parts lists, work plans and diagrams are produced

Independent manufacturing

Independent labelling using M-Print® PRO

Marking material is printed using PrintJet, SpeedMarking-Laser, ThermoMark etc.

Data is exported straight from the CAE system to labelling software

## 3-D view in CAD

Export

Import

Export the configured 3-D mounting rail to your CAD system

## We'll take care of the rest: customer-specific services

Once you've finished planning your projects using RailDesigner®, you have the option of sending all your data to us by e-mail. We will then take care of assembly and supply you with the desired configuration and anything else you need for your project.

That means:

- Manufacturing mounting rails in line with your requirements
- Assembling the mounting rails according to the configurations you prepared in RailDesigner®
- Pre-wiring and attaching markers, end brackets, etc.
- Assembling individual enclosures
- Incorporating cable glands into enclosures
- Supplying other details configured by you

All products fully comply with your requirements and are supplied with high Weidmüller quality according to your RailDesigner® configuration.

Allow us, as an external service provider to increase your capabilities by supplying you with consistently high quality products in line with all the relevant norms.

# Ensuring your success: training and customer support

## Individual training sessions

Our training sessions are focused on your needs:

- Practice-oriented and up to date
- Professional and simple to understand
- Flexible and designed with your needs in mind

Boosting your performance, securing your market lead and optimising your workflows: we provide special training sessions to make RailDesigner® as straightforward as possible for you – either here at Weidmüller or in your offices.

You will learn the advantages of this interactive ordering and planning software in an easy-to-understand way. Find out how RailDesigner® can reduce your daily workload.

Our training sessions are as flexible as your needs – we tailor them to your demands, around the globe.

## Support wherever you are

We see support as part of the product. Our configuration and purchasing software offers many options and applications, and our expert support team is there to help you if you have any specific queries. We will be more than happy to answer your questions – you can speak to someone about RailDesigner® in any country and in all of our branches, whenever you need help.
